

**I. VERSION OF THE FIRST PARAGRAPH ON PAGE 8 OF THE  
SPECIFICATION WITH MARKINGS TO SHOW CHANGES MADE**

(Crossing out of text means that it is to be deleted, underlining text means that it is to be  
added in place of the deleted text)

U. S. Patent No. 5,086,616 "~~Measure Shielding Effectiveness of Enclosures~~"  
"Monitoring Process and Device of a Quasi-Closed Electromagnet Shield" discloses a  
measurement system, however, the source of the radiation is retained inside the  
enclosure, the frequency range is limited to 1 to 100 KHz, and the source is low power.
